

# Introduction to Android Studio

---

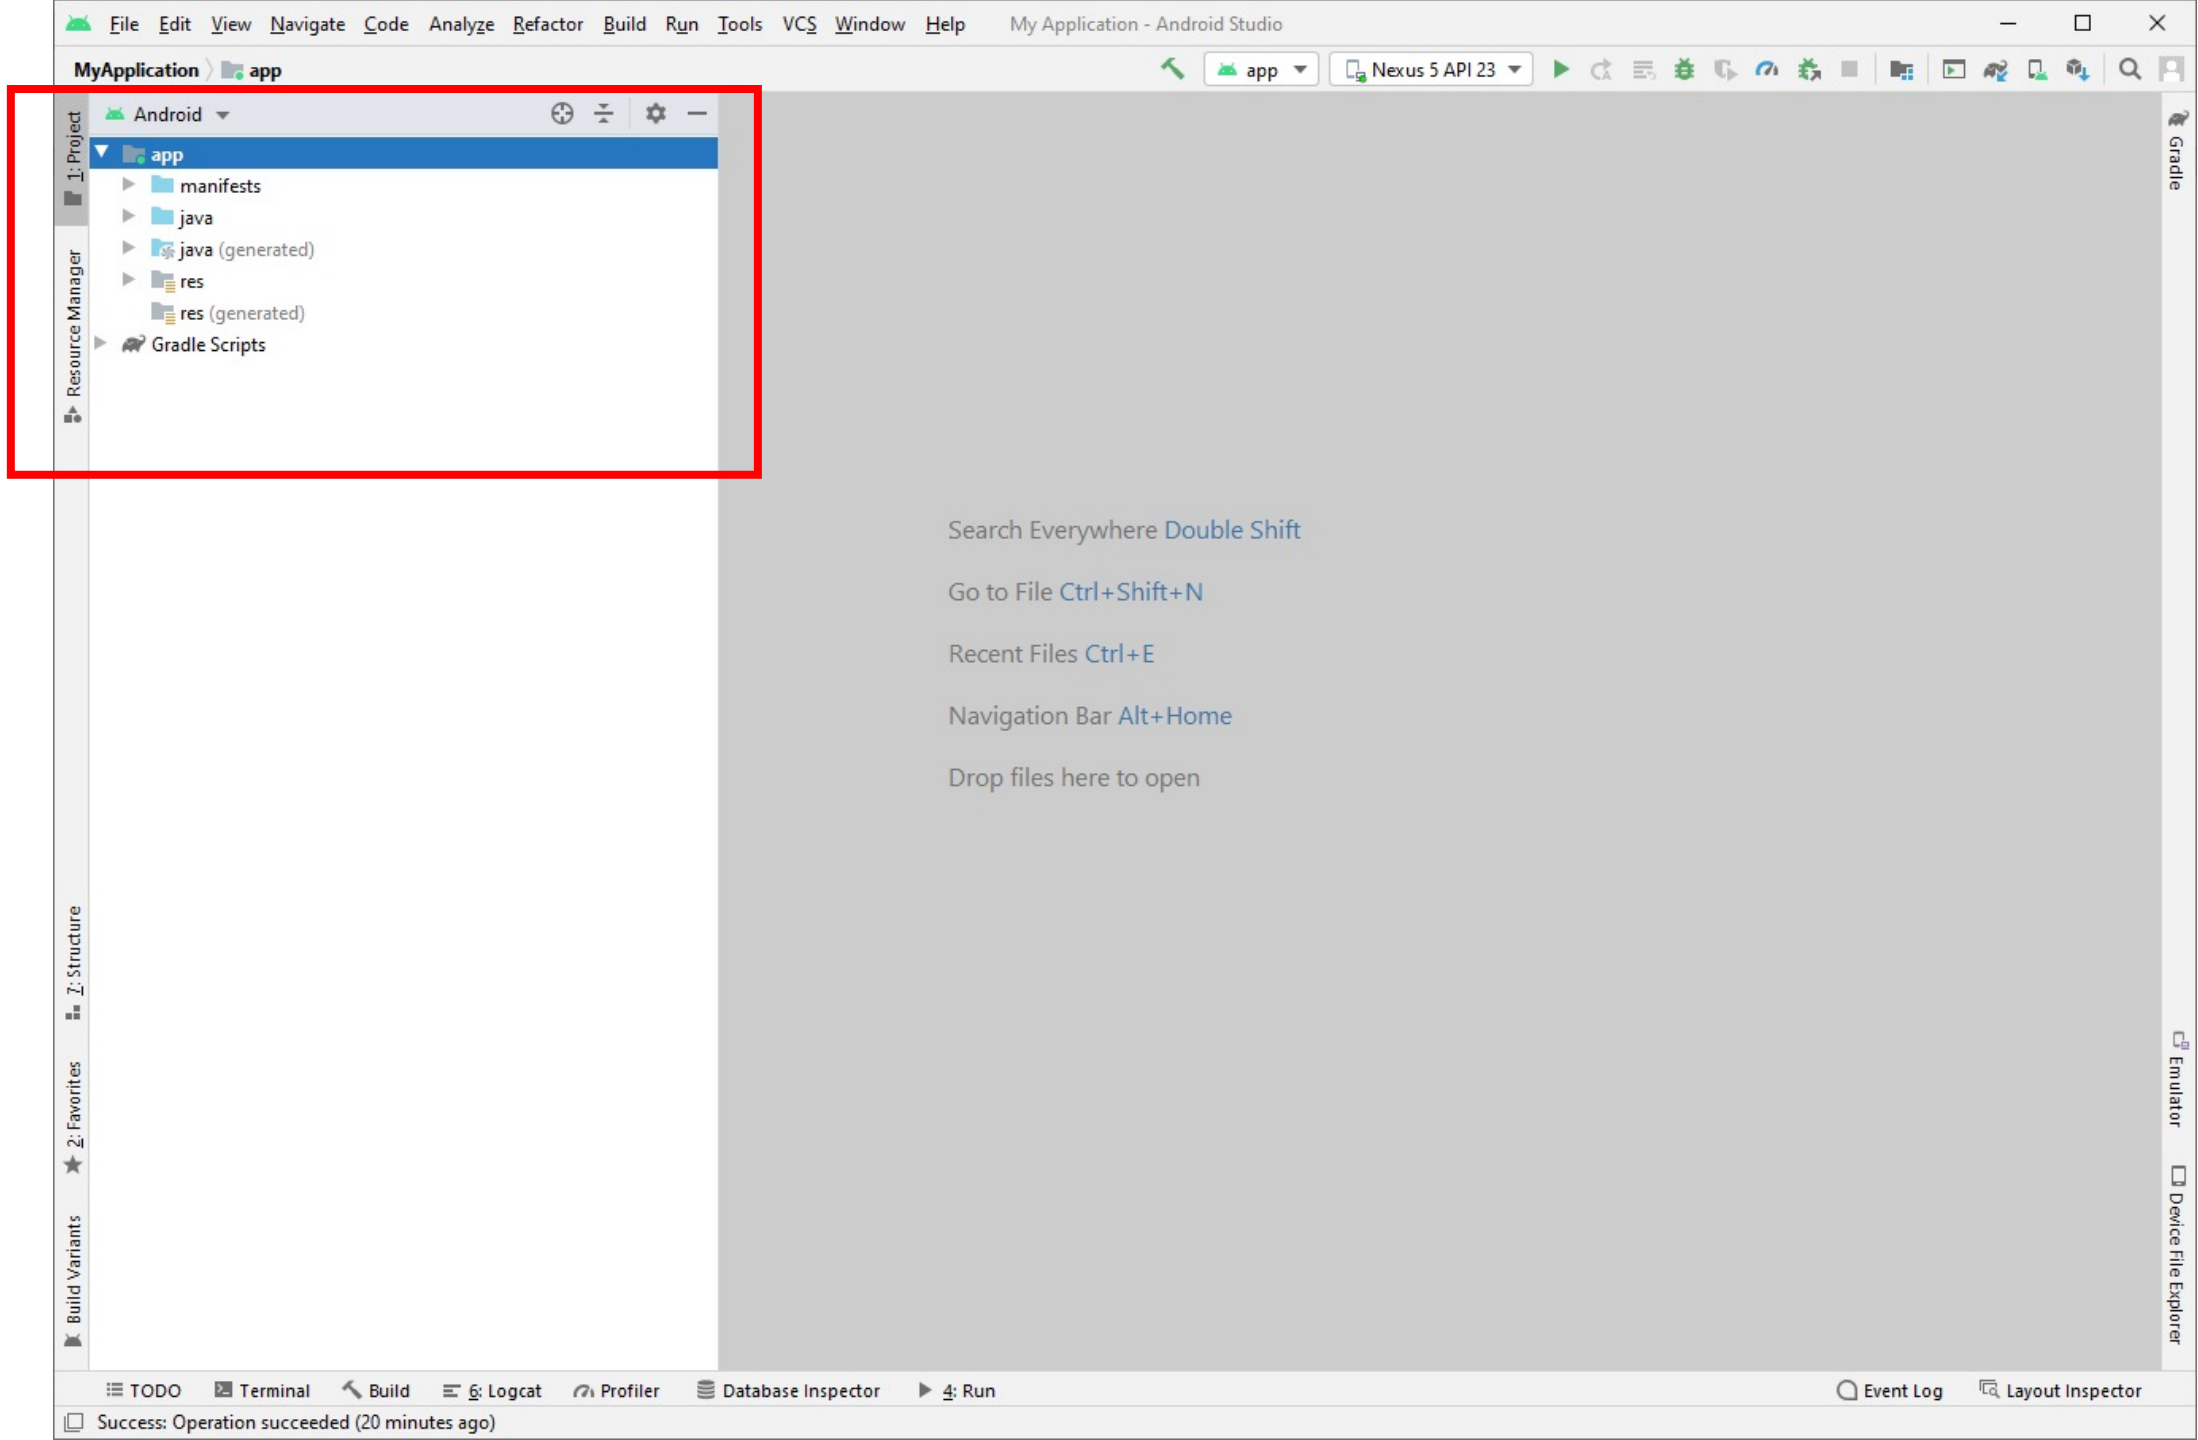

- Android Studio is an **IDE** (= integrated development environment) **for writing code** for Android OS (=Operating System)
  - IDE is like a “Word” processor but for code
  - It simplifies **writing, structuring, debugging** code (=find errors/mistakes)
- We will learn how to create Android apps in **Java** language
  - 80% of mobile apps for Android are written in Java

Task 1: Let's open & run a  
ready-made app

File Edit View Navigate Code Analyze Refactor Build Run Tools VCS Window Help My Application MainActivity.java [My\_Application.app] - Android Studio

MyApplication > app > src > main > java > com > example >.myapplication > MainActivity

Android > 1: Project > app > manifests > java > com.example.myapplication > MainActivity

Resource Manager > 2: Structure > Favorites > Build Variants

MainActivity.java

```
1 package com.example.myapplication;
2
3 import ...
4
15
16 public class MainActivity extends AppCompatActivity {
17
18     @Override
19     protected void onCreate(Bundle savedInstanceState) {
20         super.onCreate(savedInstanceState);
21         setContentView(R.layout.activity_main);
22         Toolbar toolbar = findViewById(R.id.toolbar);
23         setSupportActionBar(toolbar);
24
25         FloatingActionButton fab = findViewById(R.id.fab);
26         fab.setOnClickListener(new View.OnClickListener() {
27             @Override
28             public void onClick(View view) {
29                 Snackbar.make(view, "Replace with your own action", Snackbar.LENGTH_LONG)
30                     .setAction("Action", null).show();
31             }
32         });
33     }
34
35     @Override
36     public boolean onCreateOptionsMenu(Menu menu) {
37         // Inflate the menu; this adds items to the action bar if it is present.
38         getMenuInflater().inflate(R.menu.menu_main, menu);
39         return true;
40     }
41
42     @Override
43     public boolean onOptionsItemSelected(MenuItem item) {
44         // Handle action bar item clicks here. The action bar will
45         // automatically handle clicks on the Home/Up button, so long
46         // as you specify a parent activity in AndroidManifest.xml.
47         int id = item.getItemId();
48
49         //noinspection SimplifiableIfStatement
50         if (id == R.id.action_settings) {
```
